

Welcome

Community Meeting

Community Urban Space Project (CUSP)

September 15, 2009

Municipal Offices

Welcome and Introduction Presenters:

Ian McDougall, Director of Recreation and Culture

Royce Fu, Senior Policy Planner

Overview

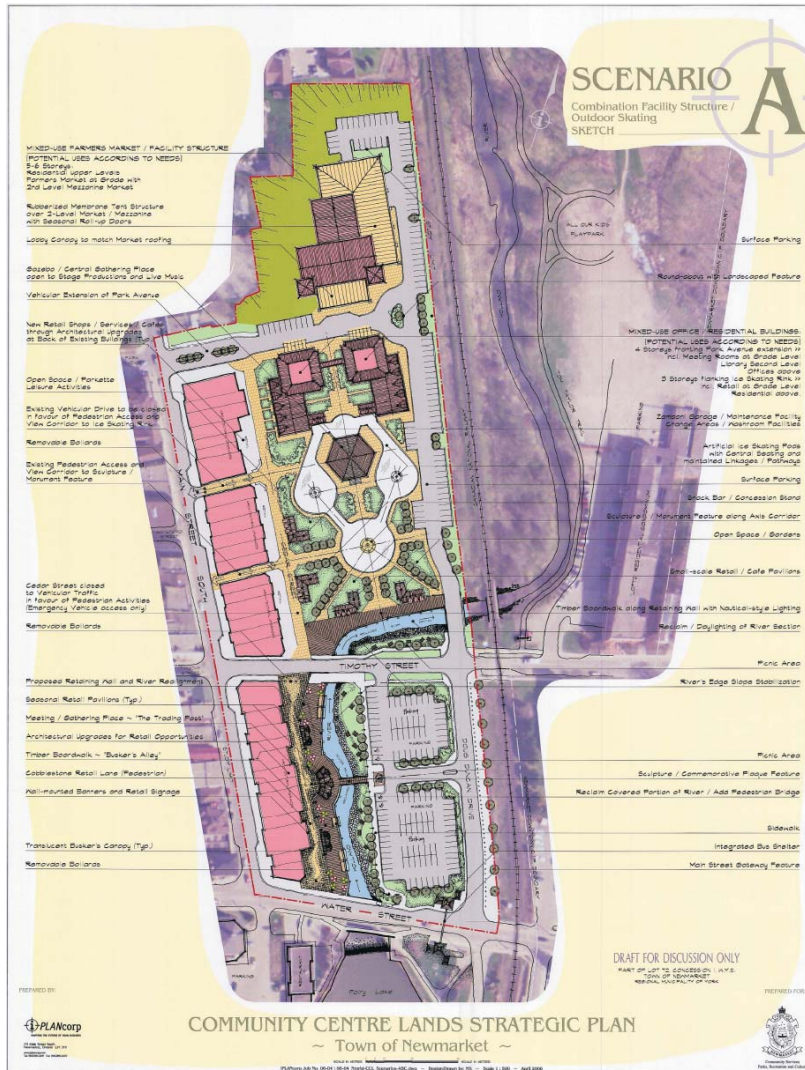

Point of origin - Blue sky process on the re-development of the Community Centre Lands.

Result – 3 Scenarios

Overview

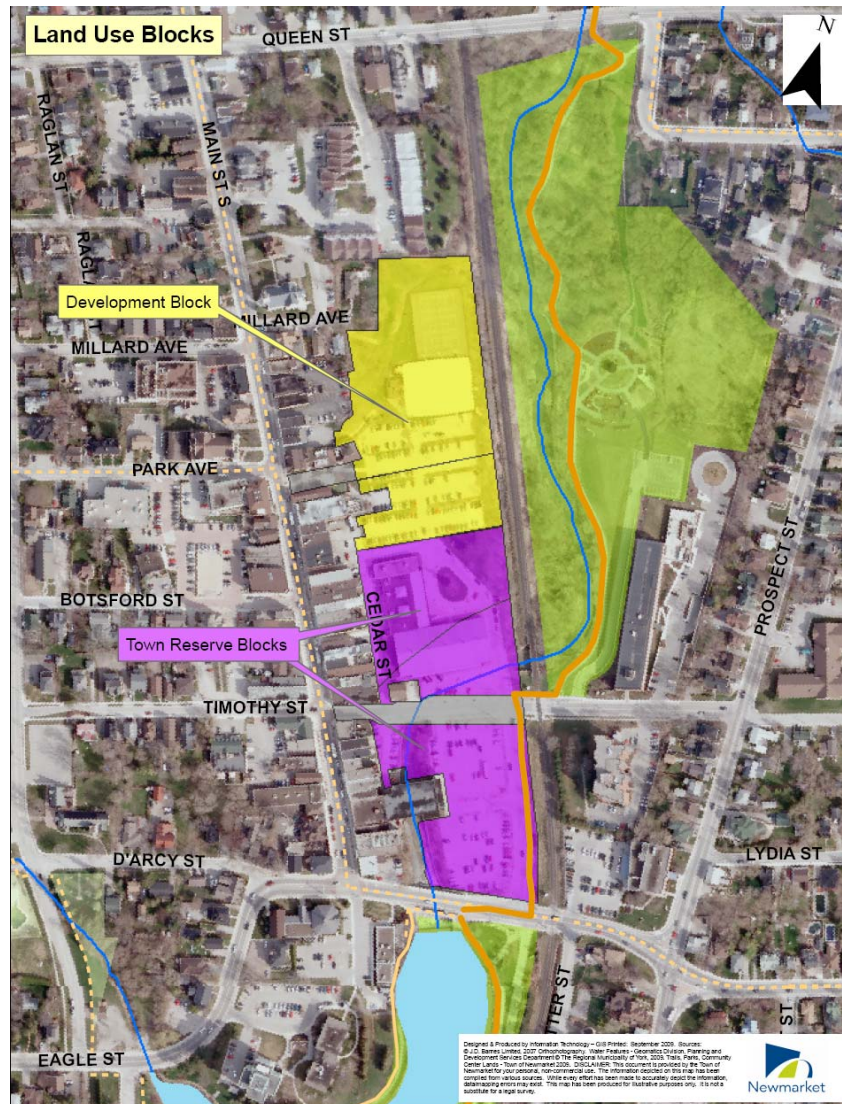

Scenarios were conceptual; subject to more detailed study

Council selected a preferred scenario = future focus on mixed use between development and recreation.

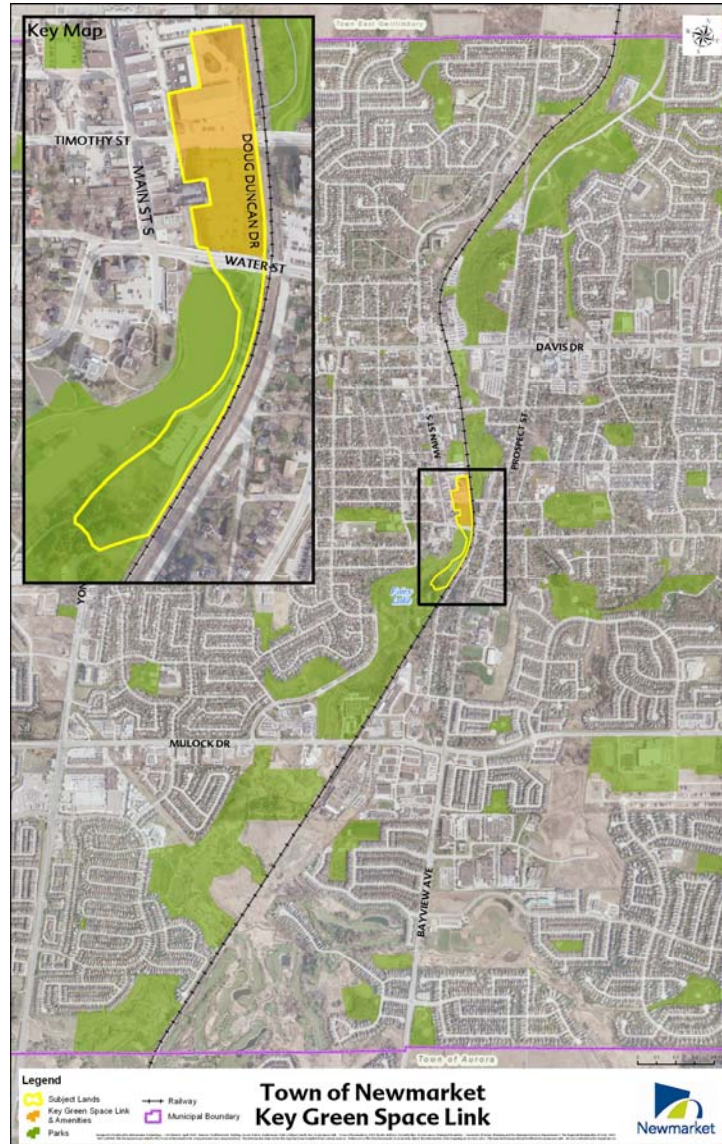

This served as the starting point for the Community Centre Lands Task Force

Overview

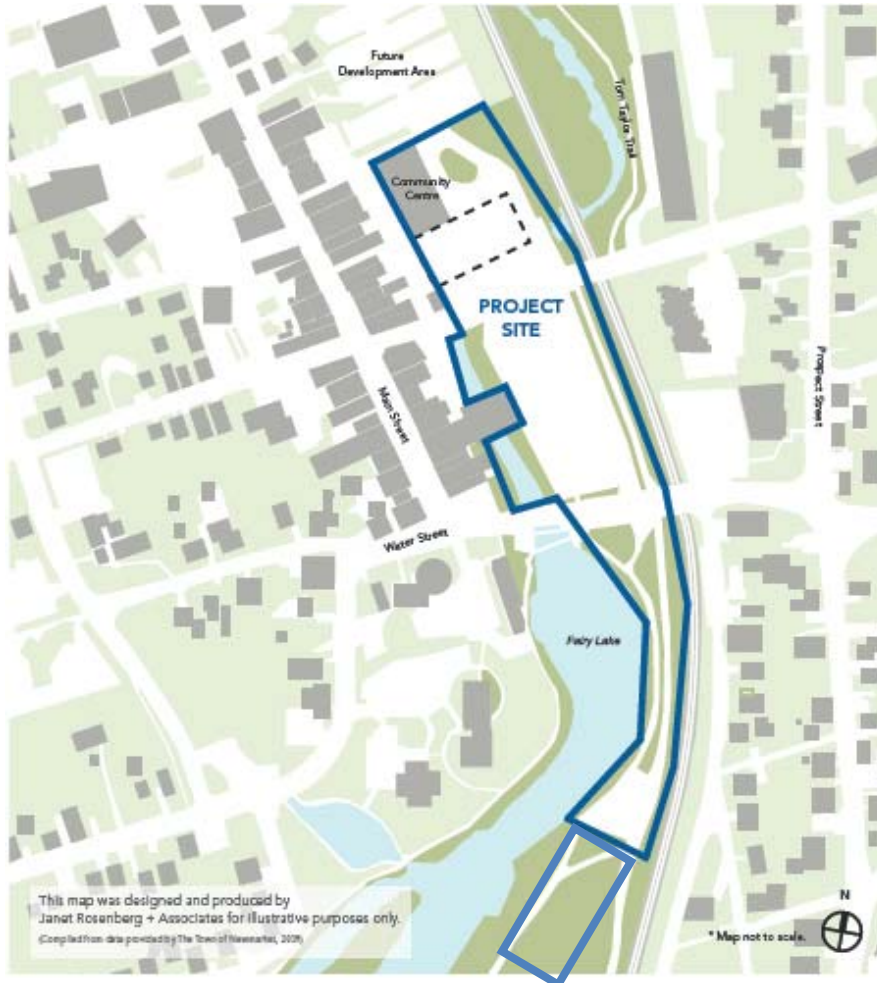

Land use narrowed down by 'blocks'. This go forward direction was adopted by Council.

Overview

New community space development location was a result of careful consideration

Overview

This area was the subject of a successful \$4,070,000 Building Canada Fund grant (BCF).

Input into the original blue sky process will be key data in the design and planning considerations

Overview

This project was awarded by public tender and is being undertaken in collaboration with The Town of Newmarket by Janet Rosenberg + Associates.
